PROFILE

As an experienced Full Stack Lead Web Developer, I have over 9 years of expertise in creating dynamic and high-performing web applications. My strong understanding of web development principles and my skills in both front-end and back-end development; has allowed me to create innovative and effective solutions.

EXPERIENCE

Lokka – Amsterdam, NL

Lead Web Developer | March 2022 to Present

As the Lead Developer at Lokka, a multi-layered communication platform for retail stores and consumers, I am responsible for the design, coding, testing, and leadership of a team of developers. I am proud of my contributions to the successful launch of this innovative solution that is transforming the retail industry. With my in-depth knowledge and a strong commitment to delivering user driven solutions, I have supported the company's mission by providing an instore retail experience through the Lokka app. (React, React Native, Node.js, Next.js, GraphQL, Graph Database)

Brookbush Institute – London, UK/Amsterdam, NL

Lead Web Developer | June 2018 to March 2022

As the leader of a small development team, I played a crucial role in creating a web and mobile application that is now utilized by 100,000+ users. My responsibilities included overseeing all aspects of the project, from high-level strategic planning to hands-on coding. I was responsible for the UI/UX designs, database schema, front-end, and back-end development. I held daily and weekly meetings with my team to track progress and report updates to the business owner, ensuring that all project goals were met efficiently and effectively. (React, Next.js React Native, Node.js, GraphQL, PostgreSQL)

Two Words – New York, US

Senior Web Developer | November 2015 to June 2018

Designed and developed websites and web applications ranging in scale and complexity. In this role, I was the sole developer of an iOS, Android and web applications which integrated various payment gateways and used social authentication. As a senior developer, I also managed a vast number of projects that the agency was involved with, which required me to provide coaching, mentoring, and strategic planning. (ReactJS, React Native, NodeJS, Redux, Python, PHP, SASS, Gulp, jQuery, MySQL, MongoDB, PostgreSQL)

EDUCATION
